PRESS RELEASE:

Tallysman Wireless Signs a New Distributor for Singapore

Ottawa, Canada – November, 2013 – Tallysman Wireless Inc., a pioneer in design and manufacturing of high performance GNSS (Global Navigation Satellite System), Iridium™ and Globalstar™ antennas, and associated components, is pleased to announce the addition of an authorized Distributor of its products for Singapore.

Molten Engineering Private Limited (<http://www.molten.com.sg/>), a Singapore registered company incorporated in 2009, specializing in providing engineering solution and services in the radio and telecommunication field.

Molten Engineering have effectively reached out and served several corporate and government agencies such as Singapore Technologies Engineering Ltd, Maris AS and the Republic of Singapore Navy.

Working closely with its customers, it has successfully designed and integrated products into different communications systems.

“Molten Engineering is proud to be associated with Tallysman and looks forward to introducing the high performance Tallysman GNSS, Iridium and Globalstar antennas to Singapore based companies.” said Johnny Tan, Director, Molten Engineering Pte, Ltd.

“Singapore is one of the foremost countries in the World for maritime activities which relies heavily on GNSS for navigation and positioning.” stated Gyles Panther CEO of Tallysman Wireless, “We are pleased to be represented by a company of the stature of Molten Engineering in this important part of the World.”
